

♥ objective

To continue innovating in the field of interaction design and develop the most compelling, useful and exciting rich media content possible.

♥ experience

{ (summer 2007 - current)
Senior Interactive Developer
Crispin Porter + Bogusky }

- Worked directly with Art Directors, Creative Directors, Designers, and Producers/Project Managers to facilitate large-scale interactive project development.
- Lead-Developer for vw.com, creating advanced load strategies for site optimization, crafting jsfl applications to shorten and manage team development time.
- Lead developer for CocaColaZero.com, created and expanded technical capabilities for promotional games.
- Developer for Amex Open, pushing the boundaries of graceful degradation using css and javascript.

{ (fall 2005 - summer 2007)
Art Director / Technical Director
NikkelKrome }

- Developed research process to organize R&D efforts, optimize developer and designer workflow, encourage sustainable departmental growth and operate as thought-leaders in the interactive space.
- Coordinate visual redesign and information/interaction design.
- Lead the site architecture, structure and interaction design.
- Manage team of UI designers responsible for design and development of applications and media sites for top US fashion houses.
- Design and develop dynamic Flash Remoting web applications using PHP connected to MySQL.

{ (summer 2000 - fall 2002)
Senior Designer
NetcoreDigital }

- Promoted rapidly from second-level graphic designer to lead graphic designer based on quality of work in a short-turnaround comprehensive website project for commercial music entity Columbia/Destiny's Child.
- Featured twice on peer-selected coolhomepages.com for Flash-enhanced web design work; web designs have also been highlighted on PixelMakers (www.pixelmakers.net/).
- Earned extensive repeat website development business from Def Jam record label.

♥ skills

An innovative interactive professional with over nine years experience in commercial interactive development & design, national-market web development, and original design work. Concentrated experience in web design and multimedia production for tier one brands. Highly intuitive design sensibility, with demonstrated effectiveness translating loosely defined client ideas into market-targeted designs. Growth-driven work ethic with capabilities to quickly learn new 2D & 3D design/development technologies. Adaptable teamwork skills; collaborate effectively with remote project contributors.
